

HBCO Clampshell Bucket

Gusella Bakker

The grab, open or closed, for small to medium jobs. Suitable for normal excavation work in sand and light clay, for use on (mini) excavators of about 2500 to 4500 kg. Excellent to use for digging graves, trenches, etc. The open version is ideal for loading curbs, sleepers, pipes, etc. Using side plates on the HBCO, like the HBC, you can also use the grab to load gravel, split sand, silver sand, etc. Equipped as standard with a central lifting point and a double-wall cylinder with two pistons, which gives the grab a very high penetration capacity. For heavier excavation work, for example in heavy clay, teeth can be fitted.

Accessories : suspension plate, side plates, rotator, link, ejector.

Type	Width	Capacity	Weight	Working pressure	Press strength
HBCO 40	400 mm	115 ltr	131 kg	250 bar	36 kN
HBCO 50	500 mm	145 ltr	142 kg	250 bar	36 kN
